

Masticating juicer

- MicroMasticating technology
- Metallic Grey
- LED feedback
- Extra filter

HR1897/31

Unleash all the goodness into your glass

MicroMasticating extracts up to 90%* of the fruit

Philips innovative MicroMasticating technology is designed to open up the cells of your fruits and vegetables to squeeze the maximum of your ingredients. After juicing all parts can be rinsed clean in 1 minute thanks to its no sieve design.

Benefits

Extract all the goodness from fruits and vegetable

- MicroMasticating extracts up to 90%* of the fruit
- Juice all your favorites, including bananas and mangos
- Include leaves, greens and nuts in your drinks
- Pre-clean function squeezes last drops of juice out

A juicer you can finally rinse clean

- Easily detachable and rinsed clean without any kitchen tool
- Unique no sieve design for cleaning in under 1 minute
- Innovative drip stop keeps your counter clean

- LED lights give you reassembly feedback

Thoughtfully designed for your kitchen

- Slim juicer with all integrated parts
- Juice directly into your glass
- Inspiring recipe book included
- Detachable parts can be stored in the pulp container

PHILIPS

Features

MicroMasticating technology

Fruits and vegetables have many thousands of cells that contain juice, vitamins and other vital nutrients. Philips innovative MicroMasticating technology is designed to open up the cells to squeeze the maximum of your favorite ingredients and will help you to get up to 90%* of your fruits into the glass and not as waste.

Soft fruits to hard vegetables

Make delicious healthy juices from soft fruits and hard vegetables. You can juice all your favorite combinations and use this products even for those especial starch ingredients that are normally very difficult to juice such as bananas or mangos.</p></div>

Leaves, greens and nuts

Leaves and greens full of fibers are also great ingredients for healthy juices and they can all be processed in this juicer. Wheatgrass, spinach and many others could be an important health adder to your daily juices with MicroMasticating technology. You can even use certain kind of nuts, like the almond to prepare almond milk.

Pre-clean function

The pre-clean function is a special program that squeezes last drops of juice out of the juicer while cleaning the inside of your product at the same time. This will help you to get the best from your fruits and vegetables and avoid that valuable juice goes to waste in the cleaning process.

QuickClean in 1 minute

With an easily detachable design and rimless parts, this juicer can be quickly cleaned using only tap water. Because there are no sharp edges, the fibers or particles of ingredients are rinsed away in seconds.

No sieve design

Our unique no sieve design allows the juice to flow seamlessly to your glass going through a filter that removes any unwanted part from the juice and is so easy to clean that you don't need any brushes.

Innovative drip stop

Fully integrated drip stop allows you to stop between juicing sessions and keep your counter top clean at all times. Simply push the bottom of the juice outlet and without wetting your fingers the juice flow will stop.

LED feedback

LED gives you feedback when operating this juicer. After reassembling you will know when the product is ready to juice again or if you still need to place the parts in the right places. Everything with your safety in mind.

Slim design

The optimized design with 11cm width allows you to keep the juicer always on your counter top, making it ready to juice at any time. It takes very little working space in storage as well as when in use because it is fully integrated, so you don't need any external compartments when juicing.

Avance Collection

Directly into your glass

Juicing directly into the glass allows you to tailor each glass to the taste of your family members, to avoid using and having to clean unnecessary parts and keeps your counter top clear.

Inspiring recipe book

Selection of your recipes and ingredients is an important part of your juicing experience. In this book we provide inspiration in 40 recipes and give you full guidance on the health benefits you get from those recipes.

Integrated storage

All smaller removable parts of the juicer, such as the tray, the pusher and the juice jar can be stored inside the pulp container. This way you keep all parts safely stored and always know where to find them for your next juicing session.
