Features

VitaShield IPS

VitaShield IPS

VitaShield IPS with its aerodynamic design and NanoProtect Pro Filter has a boosted clean air delivery rate up to 270 m³/hr. It can effectively remove ultra-fine particles as small as 0.02µm. Also it filters out harmful gases such as formaldehyde and TVOC.

Filter HEPA Series 1

The extra thick NanoProtect HEPA is designed for superior purification efficiency and lifetime against airborne particles.

Auto Mode

Indoor PM_{2.5} levels can increase far above local guidelines because of outdoor pollution or daily activities like cooking, cleaning etc. The smart air sensor can detect PM_{2.5} levels and boost the air purifier's speed to deal with the pollution.

Night sensing mode

Night sensing mode is developed especially for your bedroom; The air purifier rapidly prepares your bedroom air for sleep and constantly monitors your bedroom air quality, delivering clean air while you sleep. The dimmed and/or switched off lights and the low sound help you and your family sleep better.

Healthy air protect

The healthy air protect alert lets you know promptly when it is time to replace the filter. If the filter is not replaced promptly, the appliance stops functioning - to avoid ineffective purification. So you are assured of healthier air always.

Child lock

Real-time air quality feedback

The color ring on dashboard provides a clear view on air quality by 4-step color, ranging from blue (good allergen & particle level) to red (bad allergen & particle level).
