

#### Pro Straightener

- Titanium floating plates
- Accurate control 230 C
- Ionic conditioning
- 10 sec. heat up time

HPS930/03

## Professional Titanium plates, faster straightening

The Philips Pro straightener offers the best a straightener needs: Titanium floating plates with best heat conduction for fast straightening with optimal pressure. A 10sec heat-up time for immediate straightening and digital temp control.

### Benefits

#### Less hair damage

- Prevent hair breakage with floating plates
- More care with ion conditioning for shiny, frizz-free hair
- Faster, yet more caring with high-performance heater
- Healthy hair without hotspots with Even Heat Distribution
- ThermoGuard prevents unintentional heat exposure above 200°C

#### Beautifully styled hair

- Professional titanium coating for best heat conduction

#### Easy to use

- Long (110mm) plates for fast and easy straightening
- Instant heat-up time of only 10secs
- Salon approved 2.5m cord length
- \*2- year warranty plus 3 years, upon online registration
- Digital temperature settings for absolute control
- Safe storage of the product with Heat protection cap

**PHILIPS**

## Features

### Titanium coated plates

Titanium coated plates, used professionally, are valued for their robustness and quick heat transfer, resulting in faster straightening. At the same time titanium is microscopically smoother than ceramic providing optimal friction and therefore limits damage to the hair.

### Floating Straightening Plates

The floating plates move, when too much pressure is applied during straightening. This protects the hair shaft from being damaged and therefore avoids overall hair breakage.

### Ionic Care

Give your hair an instant care with ionic conditioning. Charged negative ions eliminate static, condition the hair and smooth down the hair cuticles to intensify the hair's shine and glossiness. The result is hair that is beautifully shiny, smooth and frizz-free.

### Long professional plates

The straightening plates have a professional length of 110mm, leading to faster and easier straightening.

### 10 sec. heat-up time

The high-performance heater used in combination with the titanium plates, enables an instant heat-up time of only 10 seconds. Switch the straightener on and you are ready to start straightening.

### High-performance heater

This straightener keeps a more constant temperature and therefore constant results. Thanks to its high-performance heater it allows you to straighten your hair at a more caring temperature while getting the exact style you want! Your styling will be faster, since you need less strokes, while straightening.

### 2.5m cord

The salon approved long cord length of 2.5m results in improved flexibility and ease of handling, so you can use it anywhere you want.

### 5 Year warranty\*

This product has been thoroughly tested to deliver professional performance, and a long-lasting guarantee of 5 years.

### Digital temperature settings

The temperature wheel, used in the professional world, allows to precisely set the temperature best suited for each hairtype. This is a unique combination of a professional temp setting wheel, with a digital display and precise temperature control.

### Even Heat Distribution

Advanced Philips EHD technology means that your straightener will always distribute the heat very evenly - even at high temperatures, and prevents damaging hot spots. This gives added protection and thus helps to keep your hair healthy and shiny.

### ThermoGuard

Prevent unintentional heat exposure with Thermoguard, by increasing temperature with steps of 5°C only, above 200°C.

### Heat protection cap

The special Heat protection cap has multiple benefits, the most important being that it is made of heat-resistant material. After usage, slide the cap on your straightener to enable immediate storage. It will also protect your straightening plates from scratching as well as locking your straightener while stored.

## Specifications

[field not found 'disclaimer\_text']

### Technical specifications

Voltage	110-240 V
Heater type	High-performance heater
Heat up time	10 seconds
Cord length	2.5 m
Maximum temperature	230 °C

### Caring technologies

Ionic Care	Yes
Floating plates	Yes
EHD technology	Yes

### Service

5-year world-wide warranty*	Yes
-----------------------------	-----

### Features

Swivel cord	Yes
Hanging loop	Yes

### Packaging dimensions

Height	7.50 cm
Width	40.50 cm
Depth	18.00 cm
Nett weight	0.48 kg
Gross weight	0.88 kg
EAN	08710103625605
Number of products included	1
Country of origin	CN
Harmonised Systems Code	851632

### Outer Carton

Length	41.90 cm
Width	37.50 cm
Height	23.80 cm
Gross weight	5.93 kg
EAN	18710103625602
Number of consumer packagings	6
