## Features

### 2000 Watt motor

2000 W motor generates strong suction power for excellent cleaning results.

### PowerCyclone 4 Technology

PowerCyclone 4 technology maximizes airflow and performance by separating dirt from air in one go. It delivers remarkable cleaning results through highly efficient steps: 1) Air enters fast into the PowerCyclone thanks to the straight and smooth air inlet. 2) The curved airpass quickly accelerates the air upwards in the cyclonic chamber to separate the dust from the air.

### Multi Clean nozzle

The new Multi Clean nozzle delivers a thorough cleaning on all types of floors. The nozzle is designed to seal closely to the floor to ensure a good pick-up of even the fine dust.

### Integrated soft brush

The vacuum cleaner is designed with a soft dusting brush, which is conveniently integrated in the handle of the appliance, always ready to use.

### ActiveLock couplings

The ActiveLock couplings allow you to easily connect and disconnect the different nozzles and accessories from the telescopic tube while cleaning.

### Extra long ergonomic grip

This ergonomically shaped grip is convenient in use. Its extra long design gives you farther reach, so you can easily clean hard to reach places.

### Power control

The variable power setting allows you to select the optimal level of suction for the different types of surfaces you vacuum.

### EPA10 Clean air system

EPA10 filter and AirSeal capture the finest dust before the air is blown out for a dust-free environment and clean, healthy air.
