Grind & Brew

Features

Bean selector

With the bean selector you can choose between two types of coffee beans, or create your own blend by mixing them together.

Grind Selector

The grind selector knob of the Philips coffeemaker allows you to choose the ground size of your coffee to set your preferred coffee taste.

Strength select

The strength select function of the Philips Grind and Brew coffee maker lets you adjust the intensity of your coffee. Select from mild, medium or strong filter coffee.

Presettable timer

The Philips coffeemaker has an integrated timer. Simply prepare your coffee machine, set the time and wake-up to the smell of freshly brewed coffee.

Water level indicator

Philips has developed an innovative water level indicator, which allows you to see how many cups you have in the water tank easily.

Intuitive user interface

The user interface of the coffee machine is equipped with an LCD display and a unique brewing control knob, allowing you to intuitively select your coffee preferences (number of cups, strength, timer, grind-off).
