Highlights

12 different coffee drinks

Enjoy unlimited variety, from Espresso and Cappuccino to specialty coffee drinks like Americanos. So you can serve everyone the drink they prefer.

100% ceramic grinders

Our grinders are made of high-tech ceramic: exceptionally hard and precise. Fresh beans are gently ground, without risk of overheating: extracting all the best flavors and aroma, delivering a superior coffee taste for at least 20,000 cups.

AquaClean filter

AquaClean

AquaClean is our patented water filter, designed to improve the quality of your coffee by purifying water. It also prevents scale build-up in the water circuit of your coffee machine: make up to 5000* cups without descaling by replacing the filter regularly.

4 customizable user profiles

Everyone's favorites – and personalized settings – can be stored in up to 4 user profiles using the convenient display.

Customize your coffees

This Super-Automatic machine offers an abundance of indulgent options to customize your beverage to your taste. You can easily personalize and memorize length, strength and temperature for each drink. Feel free to explore, experiment and dream up any drink!

Integrated milk carafe

Enjoy super creamy cappuccino and Latte Macchiato at the perfect temperature, in the easiest way possible. Simply pour milk into the

carafe, plug it into the machine, and select your preferred beverage. Whether it's a cappuccino or frothed milk, your drink will be served within seconds, with a splash-free flow at the ideal temperature.

Extract the best of your beans

Testing by Italy's Centro Studi Assaggiatori - Italian tasters confirms that our Saeco super automatic machines extract the desirable qualities from each type of bean.

Quick high-heat water boiler

Flawless coffee calls for perfect temperatures. Our high performance boiler is made with light aluminum and a stainless steel body, which heats up to the proper high temperatures, fast.
