## STANDARD ACCESSORIES

### 1.5 L glass tea kettle with handle

Made from stainless steel and premium Schott DURAN glass with convenient water level markings, and MAX fill line. Not dishwasher-safe, hand wash only to avoid any damage.

### Stainless steel limescale filter

(on the outer section of the kettle lid)  
Keeps water impurities out of your cup. Not dishwasher-safe, hand wash only to avoid any damage.

### Kettle base with on/off button and temperature selector (5 specialty tea settings)

Designed to preserve each tea's unique flavours and aromas. The water temperature determines how much flavour is extracted from tea, and each tea type requires a different brewing temperature. The kettle automatically goes into warm mode after reaching temperature and holds for 30 minutes at 'warm' (70°C).

### Removable stainless steel steeper

Is easy to remove after the appropriate steeping time, so tea doesn't over steep. For best results, the recommendation on the tea's packaging for suggested water temperature and steep times, should be followed. This tea kettle may be used for tea bags as well as loose leaf tea. For brewing tea in the kettle or to boil water for other uses, the steeper should be simply removed. Not dishwasher-safe, hand wash only to avoid any damage.

### Lid with handle

The wide open lid is made out of 2 parts: tea steeper lid (center section of lid with handle) and kettle lid (outer section). Easy to access and easy cleanability. Not dishwasher-safe, hand wash only.

### Tea steep holder

Keeps your counter clean from water and tea drips as the steeper can be placed into the steep holder after use. Not dishwasher-safe, hand wash only.
