### STANDARD ACCESSORIES

#### 1.7 L carafe with unique pour spout design and lid

Made out of glass with markings up to 12 cups.

The pour spout helps prevent drips and messes for hassle-free pouring into cups of any size and shape.

#### Reusable gold-tone permanent filter with dosage ladder

Cup markings in the filter will take away the guesswork.

Is dishwasher-safe (upper rack).

It replaces the cone paper coffee filter (standard #4 size filter). Never use both filters together as this could cause overflow of water and coffee in the brew basket.

#### Unique 29-hole shower head

Evenly saturates coffee grounds for optimal extraction.

#### Removable water tank with dosage chart

Clear and easy to fill water tank with large opening to minimize spills.

The water tank should only be filled with the amount of water needed to brew.
