Highlights

Full breakfast set

A breakfast set designed for what truly counts. Discover the full set with matching drip coffee maker and kettle.

6 browning settings

Six settings let you toast different breads without the risk of burning. Adjust the browning setting to get your toast exactly how you want it.

2 large slots

Enjoy versatility with two wide slots for a variety of different slices - from bread to bagels and everything in between.

High-lift lever

The high-left lever is your secret weapon for safely retrieving small, hard-to-reach pieces. Simply lift the lever to remove any slice.

Auto shut-off

Toast, relax, repeat. Simply choose your browning level and watch your toast pop up perfectly done. The toaster shuts itself off after finishing for an effortless experience.

Instant stop button

Take full control of your toasting time with an instant stop button to adjust toasting settings any time you want.

Removable crumb tray

Removing crumbs is quick and simple. Just slide out the removable tray and wipe clean in an instant.
