****Test with WBSF and moisture content loss in chicken, compared with stove top cooking.

*****Based on internal lab measurement with Philips Multicookers. Cooking times measured for red bean soup or beef (from heat up to all pressures released) vs. a stove top cooker, to well cooked and soft results. Exact percentages might vary per product. (can use this disclaimer as a reference)

Safer, faster, hands-free cooking, 35 presets for endless variety, less effort, Locks in extra flavor for richer results, 8L extra capacity, perfect for gatherings and everyday meals

Highlights

Auto Pressure Release

Unlike traditional multicookers*, no manual valve turning or button pressing is required. Steam is released automatically at the end of pressure cooking — truly effortless, end-to-end cooking.

DualPulse Pressure

Unlike traditional multicookers* that hold steady pressure, our new technology alternates high and low pressure to create a precise cooking curve that locks in flavor. Up to 13% juicier** and 28% more tender** in meat.

35-in-1 multicooking

35 preset programs — from beef, lamb, chicken, and duck to vegetables, seafood, beans, soup, rice, and more — with dedicated cooking methods from pressure cook, stew, bake, slow cook, sauté, steam, jam, yogurt to reheat. Also, manual settings let you customize cooking time, temperature, and pressure level, and two shortcuts to save your favorite settings.

Extra large capacity

With the spacious 8L capacity, you can prepare generous, family-sized meals with ease — even a whole chicken or large cuts of meat — making it perfect for gatherings, celebrations, or everyday cooking.

Time and energy saving

Get meals up to 70% faster with no compromise on taste and save up to 80% less energy compared to traditional methods***. Equipped with 13 safety protection systems for worry-free cooking.

Simple intuitive control

Get step-by-step guidance tailored to your ingredients and cooking methods. Track your cooking status anytime with an intuitive light bar to follow every stage of cooking — from heat-up and pressure build-up to pressure maintenance and automatic release.

Add Ingredients button

Forgot something? Simply press the button to add ingredients, shut the lid again, and your cooking program will pick right up where it left off.

Customized temperature

Features customized high and low temperature settings for Slow Cook and Sauté, designed to suit different recipe needs and deliver ideal results every time.

Ceramic coating

The heavy-duty inner pot features a worry-free, PFAS-free ceramic coating that resists sticking and scratches for easy use and cleaning.

Safer, faster, hands-free cooking, 35 presets for endless variety, less effort, Locks in extra flavor for richer results, 8L extra capacity, perfect for gatherings and everyday meals
